## Work History

### Denver Center for the Performing Arts
12/2016 - 4/2020

**Software Developer** 7/2018 - 4/2020

Software development for internal and external web apps in various versions of ASP.NET with SQL and React with Firebase.

- Current project using React with Firebase to build a Personal Captioning app for live theatre shows.
- Updated legacy budgeting web app that interacts with a Great Plains SQL database. Some work included updated account format, improved performance, added features, and improved UI.
- Build and manage company intranet by adding new features, improving processes, and providing user training.

**Frontend Developer** 12/2016 - 7/2018

Frontend development and management for sites in WordPress, Sitefinity, and AudienceView. Email development and automation in Yesmail.

- Web Development - Made UX/UI improvements, CSS updates, HTML optimizations, and javascript interactions in WordPress, Sitefinity, and AudienceView.
  - WordPress - Built new sites for specific shows and denvercenter. org. Helped architect content, worked with designers on UI/UX, modified plugins and functionality.
  - Wordpress/Sitefinity - Provided site/content management, CSS updates, HTML optimizations, and javascript interactions.
  - AudienceView - UI/UX improvements with CSS and HTML.
  - Ensure 508 and WCAG 2.0 compliance for accessibility.
- Email Development and Automation - Created email with HTML, CSS, and Javascript. Scheduled transactional, weekly, and monthly email sends.

### Colorado Access
01/2013 - 09/2015

**Web Coordinator** - Responsible for web design and development, graphic design, content management, analytics, project management, and strategy for 11 distinct websites and applications for the company and state partner websites.

- Web Design - Lead designer on company sites. Identified site vision, strategy, identity, provided wireframes and mockups, and created and implemented design from development to launch. Ongoing analysis and refreshment of design, content, and navigation structure based on business needs and best practices.
- Web Development - Lead developer of company websites in Joomla, Drupal, and Squarespace. Developed a searchable provider

directory for our commercial health insurance exchange product and worked with IT to import data into the MySQL database nightly. Designed and developed the front end of the Electronic Coverage Determination and Service Coordination Plan web apps.

- Print Design - Brand development, design conception, and iteration, printed collateral production including logos, stickers, posters, banners, and more.
- Content Management - Coordinate with the line of business and department owners on updating content and downloadable materials. Perform site audits and code checks regularly. Improve site SEO with framework tools. Ensure 508 compliance for accessibility.
- Other Duties - Design, write, and implement AccessNews TV presentations. Create PowerPoint decks and templates.

### The Creative Group
05/2011 - 07/2012

**Contractor** - Created and managed instructional material, exams, videos, and grade books into the eCollege(Pearson) learning management system (LMS).

- Collaborated with multiple teams to build online course websites for multiple universities. Imported course materials into standard-driven HTML using the eCollege LMS platform.

# Education
